Here's the two people that have requested Seeker-Ram software so far:

H. Morrow Long - CM2
Mgr of Dev.
Yale Univ. Comp Sci Dept Computing Facility
203-432-1248
long-morrow@cs.yale.edu

Greg Newby
U of Illinois
using CM2 at NCSA
217-244-7365
gbnewby@alexia.lis.uiuc.edu

Have you heard anything more from Marshall or Otto?

Keep me posted with these two people pls. thanks.

How about EMAIL? I can send things uuecoded to some special address.

> Jonny, can we log what sites download what files?

I believe there's a way. I'll look into it.

> FTP will be the only way to go as we want to put out bug fixes. ...

Unfortunately, since we don't provide a way to build the software, we have
to put out full binaries each time. That's about 2 Megabytes for each of 4
files.

Can we find out if sites have cstar? If so, we can include object files in
the release, and then folks could rebuild the software themselves. Then we
just release the fixed objects for patches.
